Summary

I am a junior software developer, with a Diploma on Full Stack Development and advanced frontend. I am proficient in HTML, CSS, JavaScript, Python, Django, Django Rest Framework and React. I have built multiple projects showcasing my skills and you can view them in my GitHub page (linked on the top) or on the project section of this CV. I have gained understanding of agile methodologies and team projects through hackathons that I have attended. I also have a master's degree in Genetics and have been working in Life Science industry for more than 4 years, in which I have been exposed to various software and gotten excellent communication skills. My experiences in life science led me eventually to the path of software development since developing applications, tools and solutions for optimal user experience is what I enjoy the most!
